Summary

Final-year Computer Science student with practical experience in Python, React, FastAPI, and SQL through internships and personal projects. Strong interest in software development and problem-solving with a solid foundation in Data Structures, DBMS, and OOP concepts.

Education

B.Tech. Computer Science Engineering – Dr. A. P. J. Abdul Kalam Technical University
2022 – 2026 | 76.67%

Class 12th – CBSE Board – Kendriya Vidyalaya, Lucknow
2022 | 83%

Class 10th – CBSE Board – Kendriya Vidyalaya, Lucknow
2020 | 80.6%

Experience

Python Developer Intern — Infosys Springboard Oct, 2024 – Dec, 2024

- Developed a Python automation script using Selenium to download daily NSE stock reports.
- Automated report collection and email delivery workflow, reducing manual effort by approximately 40%.
- Helped save 2–3 hours of repetitive manual work per week through scheduling automation.

AI Data Annotator (Contract) — Innodata Dec, 2025 – Mar, 2026

- Worked on annotation and categorization of datasets used in machine learning workflows.
- Labeled and reviewed 300,000+ data points while maintaining high consistency across tasks.
- Completed assignments within deadlines while following project quality standards.

Projects

Interactive SQL Playground [Link](#)

- Developed a full-stack web application for writing and executing SQL queries in real time.
- Built frontend using React and backend APIs using FastAPI with SQLite integration.
- Improved backend query handling workflow resulting in faster response generation.
- Designed responsive UI for interactive database exploration and SQL practice.

Comment Classifier (ML-based) [Link](#)

- Built a machine learning model to classify toxic comments from large-scale text datasets.
- Implemented preprocessing and TF-IDF vectorization using Scikit-learn.
- Tested multiple algorithms including Naive Bayes, Logistic Regression, and LinearSVC.
- Achieved best performance using LinearSVC with approximately 97% classification accuracy.

Technical Skills

- **Languages:** Python, C++, JavaScript, SQL
- **Web Development:** React, FastAPI, HTML, CSS
- **Databases:** MySQL, SQLite, MongoDB
- **Core CS:** Data Structure, DBMS, OOPs
- **Tools:** Git, GitHub, VS Code
- **Soft Skills:** Adaptability, Time Management, Team Work, Problem Solving

Certifications & Achievements

- Qualified **GATE 2026** (Computer Science)
- Solved 600+ LeetCode problems.
- 5★ HackerRank in Problem Solving, Python.
- Python for Data Science, AI & Development (IBM – Coursera).
