Summary

Aspiring Software Engineer with strong basics in computer science and problem-solving. Eager to apply my skills in real-world projects, learn quickly, and take responsibility. I enjoy working in teams, adapting to challenges, and aim to deliver quality results while growing as a professional.

Education

B.Tech, Computer Science (IoT) – Dr. A. P. J. Abdul Kalam Technical University, Lucknow
2022 – 2026 | 76.7% till 5th Sem

Experience

Intern – Infosys Springboard

October 25, 2024 – December 31, 2024

- Built and deployed an **Automated NSE Report Generator**, cutting **data retrieval time by 70%** and enabling faster decision-making.
- Developed **automation workflows** with Python, Selenium, and schedulers, reducing manual effort and improving **data accuracy**.
- Optimized **data management pipelines**, enhancing efficiency in reporting and defect detection processes.

Technical Skills

- Languages:** Python, C++, JavaScript, C, SQL
- Web Development:** React, FastAPI, NodeJS, HTML, CSS, REST APIs
- Databases:** MySQL, Oracle, SQLite, MongoDB
- Data & ML:** Scikit-learn, Pandas, NumPy, Matplotlib, NLP
- Core CS:** DSA, DBMS, OOPs, Operating Systems
- Tools:** Git, GitHub, VS Code
- Soft Skills:** Adaptability, Time Management, Team Work, Problem Solving

Projects

Comment Classifier (ML-based) [Link](#)

- Designed and deployed a multi-label classification model (Naive Bayes, Logistic Regression, LinearSVC), achieving ~97% accuracy across toxicity categories.
- Built scalable ML pipelines with Scikit-learn and NumPy, improving training and prediction speed.
- Enhanced content moderation by delivering a reliable NLP solution for harmful text detection.

Interactive SQL Playground [Link](#)

- Developed a real-time SQL query execution engine with React, FastAPI, and SQLite, enabling hands-on practice for learners.
- Optimized backend request handling, reducing query response times by ~40%.
- Delivered an interactive web platform supporting SQL learning and validation.

Insightify – Sales Analytics Software [Link](#)

- Built a real-time analytics dashboard for sales trend detection and insight generation.
- Improved reporting pipelines using Python, SQL, and NumPy, enhancing data reliability and speed.
- Delivered a scalable visualization tool that enabled faster, data-driven decisions.

Certifications & Achievements

Google Generative AI (Coursera) | Microsoft Azure SQL Fundamentals (Coursera) | Infosys Web Development Fundamentals | Generative AI: Introduction and Applications (IBM – Coursera) | Generative AI: Prompt Engineering Basics (IBM – Coursera) | Introduction to Artificial Intelligence (IBM – Coursera) | Solved 600+ LeetCode problems | 5★ HackerRank in Problem Solving, Python, C++
